Ideation Phase
Brainstorm & Idea Prioritization Template

Date	31 January 2025
Team ID	LTVIP2026TMIDS82222
Project Name	HouseHunt – Finding Your Perfect Rental Home
Maximum Marks	4 Marks

Step-1: Team Gathering, Collaboration and Select the Problem Statement

👥 **Team Members:**

- Siva Manikanta Baswa
- Venkata Surya Vikram Nakka
- Vijay Vardhan Nathi
- Narshe Harshini

🧠 **Discussion Summary:**

The team discussed common problems faced while searching for rental homes. Many renters struggle with:

- Fake property listings
- No centralized booking system
- Lack of owner verification
- Manual communication process
- No real-time booking status tracking

🎯 **Selected Problem Statement:**

"To develop a secure and user-friendly web application that connects renters and property owners with admin verification, enabling smooth property listing, inquiry, and booking management."

Step-2: Brainstorm, Idea Listing and Grouping

💡 **Brainstormed Ideas:**

Idea No	Idea Description
1	Build a rental house listing website
2	Add owner verification through admin approval
3	Provide booking request system

Idea No	Idea Description
4	Add booking status tracking (Pending/Approved/Rejected)
5	Implement JWT authentication for secure login
6	Add property availability status
7	Include property image uploads
8	Enable search filters (location, price, type)
9	Add chat/messaging feature
10	Add online payment system

📁 **Grouping of Ideas**

🔐 **Security Features**

- JWT Authentication
- Admin Approval for Owners
- Secure Login System

🏘️ **Property Management**

- Add/Edit/Delete Property
- Property Images
- Property Availability Status

📅 **Booking System**

- Booking Request Form
- Booking Status Tracking
- Owner Approval of Bookings

🚀 **Advanced Features (Future Scope)**

- Online Payment
- Chat System
- AI Recommendations

Step-3: Idea Prioritization

🎯 **Prioritization Criteria:**

- Feasibility (Can we build it in time?)
- Technical complexity

- Impact on users
- Marks scoring potential

📊 **Priority Matrix**

Priority Level	Features
🔴 High Priority (Must Have)	User Registration & Login, Property Listing, Booking System, Admin Approval
🟡 Medium Priority	Property Filters, Image Upload, Booking Status Tracking
🟢 Low Priority (Future Enhancement)	Online Payment, Chat System, AI Recommendations

🏆 **Final Selected Core Features for Development:**

1. User Authentication (Renter & Owner)
2. Admin Approval for Owner
3. Property CRUD Operations
4. Booking Request & Status Management
5. Secure MERN Architecture

📌 **Conclusion of Ideation Phase**

Through collaborative brainstorming and structured prioritization, the team finalized the development of a MERN-based rental management system named **HouseHunt**. The project focuses on solving real-world rental challenges with a secure and scalable technical architecture.
